

CONCRETE

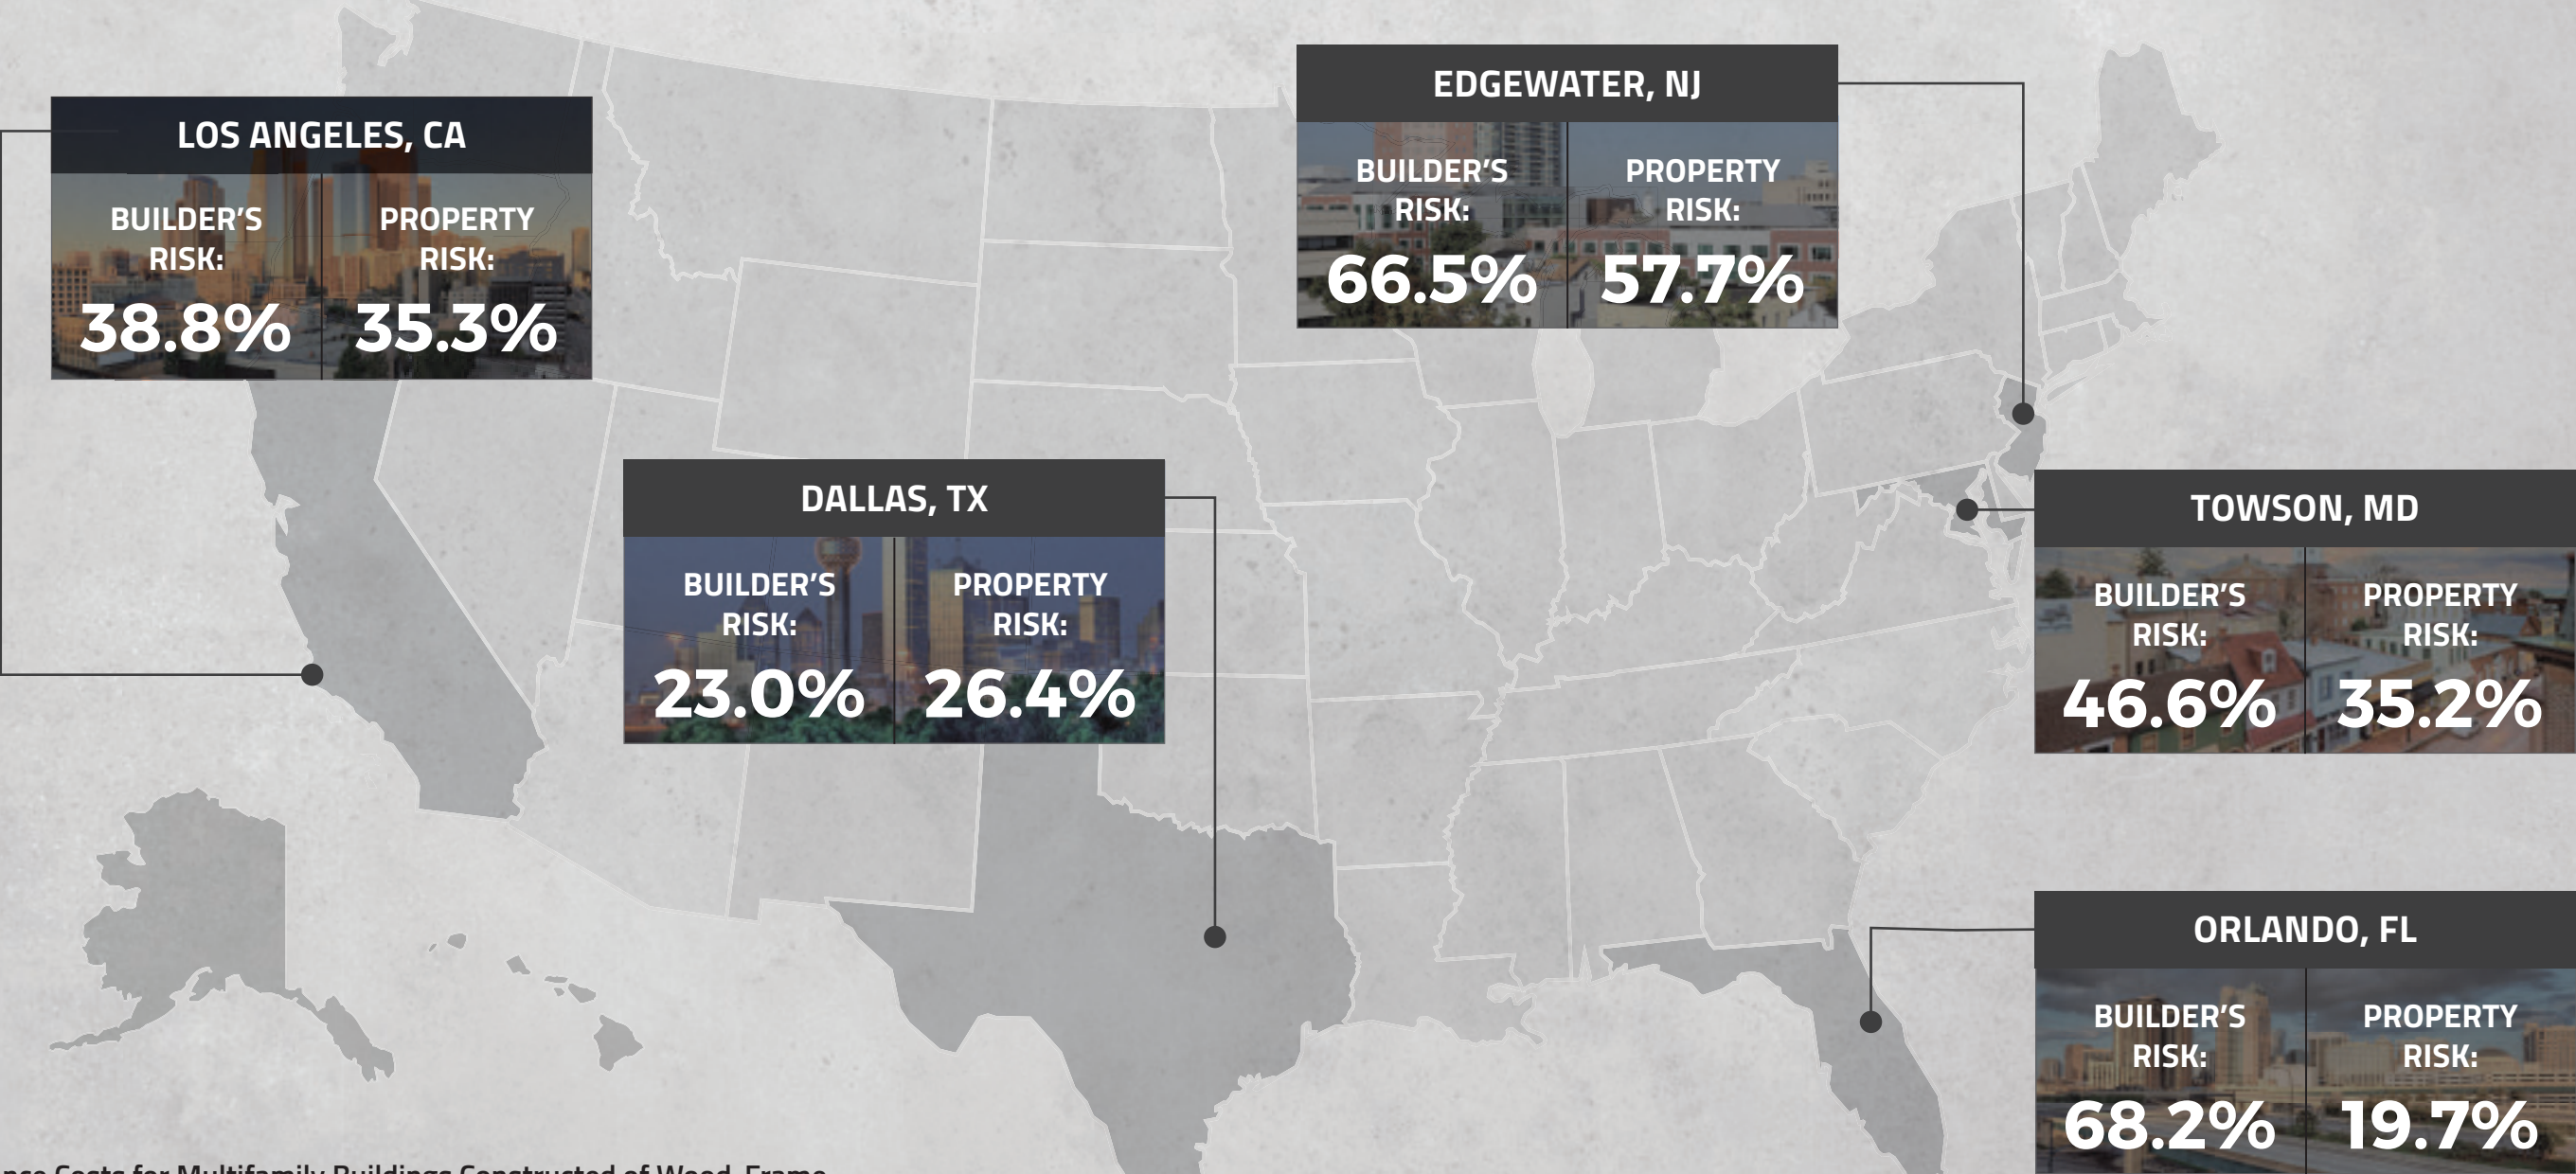

vs.

WOOD

STUDIES SHOW CONCRETE SAVES ON BUILDER’S RISK INSURANCE AND PROPERTY INSURANCE

It’s not complicated: choosing concrete over wood-frame means less risk. And the lower the risk, the more money you save. Concrete is an insurance company’s dream. In fact, nationwide studies in key regions across the ccountry show that concrete construction results in significantly lower rates on Builder’s Risk Insurance and Property Insurance for multifamily buildings.

CONCRETE INSURANCE SAVINGS OVER WOOD:

* Survey of Insurance Costs for Multifamily Buildings Constructed of Wood-Frame and Concrete, Dr. Pieter VanderWerf and Nicholas Haidari, Boston College, National Ready Mixed Concrete Association, Silver Spring, MD. October 2017.
